Paul, we bought the seed blend as required and scared the ground and seeded the areas that were on our mining permit over the last couple of years. The attached pictures are of the process being completed. Tomorrows store will be the second one since we completed the seeding. WE are now in the area that we marked off with you last fall with your satellite marking device. If you need anymore paper work for that area let me know. We didn't mess with scaring or seeding the area that the military insists is theirs, in fear that they might consider it as being a trespass. I will see you in the morning for the Assessment Conference on Cessation Order MN 2006-03-11. Thanks, Craig.
